I build scalable web and mobile applications. Always exploring new tools, frameworks, and better ways to solve problems. Currently diving deep into mobile development and on-device AI.

EDUCATION

Sept 2025 - Nov 2026

Malmö Yrkeshögskola

iPhone & Android Programmer

Comprehensive program covering cross-platform mobile development with React Native and native iOS and Android development using Swift/SwiftUI and Kotlin/Jetpack Compose.

- Includes on-device AI development with CoreML and ML Kit, interaction design for mobile devices, multilingual app development, and app store publishing.
- Features 20 weeks of workplace-based learning (LIA) and a final thesis project.

Mar 2023 - Jan 2025

EC Utbildning

Frontend Developer

Gained in-depth knowledge of modern web technologies and frameworks.

- Thesis project: Developed an interactive web platform for real-time tracking and visualization of outdoor cats using React, Emotion CSS, and Mapbox API with responsive design and dynamic data visualization.
- Courses included: HTML5, CSS3, JavaScript, React, TypeScript, Angular, C#, ASP.NET, UX/UI design, Agile methodologies, Thesis project and 25 weeks of workplace-based learning (LIA).

EXPERIENCE

Apr - Jun 2024

Nov 2024 - Jan 2025

Strawberry

Web Developer Internship

Collaborated with senior developers in an agile, cross-functional team, gaining mentorship and best practices for efficient feature development.

- Built and maintained features with TypeScript and Preact in the Islands architecture, including reusable components aligned with design specifications.
- Worked with Contentful CMS, Storybook, Emotion CSS, and Jest, contributing to a codebase migration from SCSS to Emotion and writing accessibility-focused test coverage.
- Implemented an AI-powered script for automated alt-text generation and developed a microservice using NPM workspaces, exploring AWS Lambda for serverless deployments.
- Researched stack improvements, including migration from Koa to Hono + Vite, enhancing developer experience and maintainability.

2014 - 2023

Excellence Hotels

Front Desk Receptionist / Office Coordinator

Managed Property Management Systems (PMS), integrated systems, and automated bookings. Maintained and updated content across multiple platforms.

Trained and documented procedures for over 10 new employees across multiple systems. Identified and resolved discrepancies between different integrated systems and platforms.

COURSES AND CERTIFICATIONS

Mar - May 2025

IT-Högskolan

Python Programming for AI Development

AI and machine learning fundamentals using Python, data visualization, ML frameworks, and hands-on AI model development.

- Developed an object detection AI model for cat face identification using YOLOv8, including data preprocessing of ~50,000 images in COCO format, model training with GPU acceleration, achieving approximately 99% precision and recall.

Feb - Mar 2025

NTI-skolan

Computer Technology

Studied computer systems, networks, and operating systems.

- Gained skills in hardware and software assembly and installation, network configuration, and system security.
